

Climate is Changing Collections Management

Neil Gerlowski (Vallarta Botanical Garden)

Michael Dosmann (Arnold Arboretum)

Patrick Griffith (Montgomery Botanical Center)

Tim Thibault (The Huntington)

Nicole Cavender (The Morton Arboretum)

- 
- ▶ What are the biggest climate change threats to your garden?
 - ▶ Is your garden taking measures with your collection in anticipation of climate change?
 - ▶ Do you have institutional priorities in place that guide decisions?

- ▶ Do you have a good understanding of how plants in your collection are responding to current patterns of climate?
 - ▶ Regular evaluation system in place?
- ▶ How do you use the information gathered from collection to make decisions?
 - ▶ Is climate influencing these decisions?

- 
- ▶ What is the most important use of resources to manage the future health of living collections?

To collect and study trees, shrubs, and other plants from around the world, to display them across naturally beautiful landscapes for people to study and enjoy, and to learn how to grow them in ways that enhance our environment.

Our goal is to encourage the planting and conservation of trees and other plants for a greener, healthier, and more beautiful world.
