Plants and People: Some Promp

What's your favorite / most notable / most terrifying plant encounter?

What's the first plant you remember? What was significant about that encounter?

Have you moved and you miss a plant from home? Have you found a new one to love?

What are some plants you like to cook with? Why?

Is there a medicinal or useful plant? How is/ was it used? How did you learn about it?

Is there a plant with myth/ mystery/ symbolism surrounding it?

Plant Life: Some Prompts

What are some challenges the plant faces? Water? Sun? Shade? Herbivores? Fire?

Where or when does the plant thrive? Seasonally? Geographically? Culturally?

If the plant could share one story of its life, what might that be?

Does the plant change over time? How?

Does it DO anything? Tropisms or nastic responses?

Do you think the plant communicates with other organisms? If so, how?
